EQR ANNOUNCES SUCCESSFUL \$22.5M INSTITUTIONAL PLACEMENT

EQ Resources Limited is a global tungsten producer with mining activities in Australia and Spain.

HIGHLIGHTS:

- EQR has received firm commitments to raise \$22.5M (before costs) via a share placement with an issue price of \$0.032 (3.2 cents) per share (**Placement**).
- Demonstrating broad appeal, the Placement attracted significant interest from a range of institutional and sophisticated investors, encompassing both new and established investors from domestic and international markets.
- Proceeds from the Placement will be used to support Mt Carbine production and growth initiatives, creditor management and improvement of debt position, working capital and Placement costs.

EQ Resources Limited (“EQR” or “the Company”) is pleased to announce the Company has received firm commitments for \$22.5M of new capital from a well-supported placement of 703.125 million new fully paid ordinary shares (**New Shares**). Strong support was shown for the Placement from a broad range of existing and new institutional and sophisticated investors.

EQR Chief Financial Officer, Jono Kort, commented: “We are pleased that we successfully closed this placement at a time where tungsten prices are at record highs. Our Saloro operation in Spain commissioned several improvement projects in August 2025 which could not have been achieved without the royalty arrangement agreed to with our largest shareholder, Oaktree. This placement will enable us to efficiently pursue the further development of the Mt Carbine operation by further progressing the south wall stripping to access the high-grade Iolanthe vein, to progress the doubling of plant capacity initiative and improve both our working capital and debt position.”

The Placement was conducted by joint lead managers, Canaccord Genuity (Australia) Limited and Henslow Pty Ltd (**Lead Managers**).

Details of the Placement

The Company will issue 703.125 million New Shares at an issue price of \$0.032 (3.2 cents) per share under the Placement to raise gross proceeds of \$22.5M (before costs). The 15-day VWAP

price of the Company's shares used to calculate the issue price was \$0.036. The issue price represents a 11.3% discount to the 15-day VWAP.

The Placement Offer Securities comprises the following:

- (a) The issue of Offer Securities utilising the Company's remaining capacity under listing rules 7.1, 330,000,000 Ordinary Shares, and 7.1A, 240,245,602 Ordinary Shares, (**Tranche 1**); and
- (b) The issue of the balance of the Offer Securities subject to shareholder approval under listing rule 10.11 (**Tranche 2**).

The Company may proceed with Tranche 1 irrespective of whether shareholder approval for Tranche 2 is obtained.

A total of 570.245 million New Shares will be issued under Tranche 1 utilising EQR's current placement capacity with an approximate issue date of Tuesday, 9 September 2025.

A further total of 132.879 million New Shares are to be issued under Tranche 2, subject to shareholder approval at an Extraordinary General Meeting (EGM) to be held in October 2025. These shares are to be issued to EQR's largest shareholder, funds managed by Oaktree Capital Management L.P. (Oaktree) who have subscribed for new shares on a pro-rata basis to their existing shareholding, with a value of approximately A\$4.25M.

In August 2025, EQR executed an agreement with Oaktree for a 2.5% NSR royalty on the Saloro operation, the grant of the royalty being subject to conditions (i.e. shareholder approval). Oaktree advanced US\$7.5m as a pre-royalty loan. The Company intends to reduce the pre-royalty loan by A\$4.25M utilising funds received from Oaktree's A\$4.25M participation in the Placement. Any NSR royalty grant will be reduced proportionately.

Use of Proceeds

Proceeds from the Placement will be used to support Mt Carbine production and growth initiatives, creditor management, debt restructuring as required, cover costs of the Placement, and for working capital.
